

Do you have a computer?

Windows 2000, XP, Vista, Windows 7 or 8?

The next step is to get some software that generates square wave frequencies.

<http://www.noriftrife.com/products.asp?cat=21> We recommend the Deluxe or the premium package because you get over 700 preprogrammed scripts with either package. The difference is you can put the software on up to 4 different computers if you purchase the premium package:

<http://www.noriftrife.com/proddetail.asp?prod=6200>

If you just want the software with the pre-programmed scripts you need the Basic Package and you can order it at this link:

<http://www.noriftrife.com/products.asp?cat=1>

Great!

Do you have an amplifier? Most any amplifier around 40 or 50 watts per channel will do. You can order our amplifier on the website or order direct at the link below for about \$50.00.

<http://www.mcmelectronics.com/product/PYLE-PCA2-/555-9975>

Do you have any electrodes? You can learn to make your own at the following link:

<http://noriftrife.com/tutorials.asp> or you purchase our Hardware kit at this link:

<http://www.noriftrife.com/proddetail.asp?prod=NRR9999&cat=37>

After your order you will receive a download that will have the instructions and software included.

If you need help please call me 512-395-4140

We also offer disposable electrodes on the website that are not required but are useful because you can stick them anywhere and reuse two or three times.
